

Venue Information

Saigon Exhibition & Convention Center (SECC) is the largest and most modern international standard exhibition center in South Vietnam, located in the heart of District 7, Ho Chi Minh City, only 15 minutes from the city center and 30 minutes from Tan Son Nhat International Airport.

General Fact

Show Name

Agrochemex Vietnam 2026

Show date

27-29/5/2026

Venue

Saigon Exhibition and Convention Center (SECC)

Address

799 Nguyen Van Linh, Phuong Tan My,
Ho Chi Minh City

Exhibition space

6,000 sqm

Target Exhibitor

350 Exhibitors

Target Visitor

3,500 Trade & Professional Visitors

Open hours

09:00 – 17:00

Participation Fee

Raw Space: (minimum 18 sqm)

Ideal for exhibitors who wish to build their own concepts

Shell Scheme: (minimum 9 sqm)

- Rear and dividing wall partition of 2.5m height in white laminated panel
- Fascia board with company name and booth number
- Needle punch carpet
- 1 x information counter
- 2 x folding chair
- 1 x waste paper basket
- 1 socket 5 amp / 220 volt single phase
- 2 x 40W fluorescent tube
- Daily cleaning

Premium Booth (minimum 9 sqm)

Includes:

- 1 Top Banner
- 2 Folding Chair
- 2 White wooden Chair
- 1 Round Wood Table
- 1 Lockable Cabinet
- 2 Fluorescent Tubes
- 1 socket 5 amp / 220 volt single phase
- 1 Waste Paper Basket

Country General Information

- Land area: 332.000 sq km
- Population: 99.5 million
- 65% of population are farmers
- 62,8% labor force engage in Agriculture sector

Vietnam Fertilizers & Pesticides Market Value

	2024	Growth in 2024 - 2030 period
Fertilizers	3,440 Million USD	3,38%
Pesticides	558 Million USD	4%

Vietnamese Agro market: a fertile area for investors Agro is the most important economic sector in the country and more than 65% of Vietnam's population is dependent on this sector. Currently, agro land occupies 80% of the country's area and as a large agricultural producer; the country offers many opportunities for the growth of agrochemical companies.

In Vietnam, the fertilizers industry has been witnessing relatively steady to high growth due to a growing demand for agricultural produce in the region. The Vietnamese agricultural chemicals market is dominated by imports. Over the past five years, Vietnam has spent about US\$500 million annually on importing plant protection products. The enterprises import the material not only for consumption in Vietnam but also re-export to other countries. Currently, the market is low regulatory, less technologically advanced and less competitive and has good opportunities for growth in the bio-fertilizers segment. Vietnam's agricultural seed market is worth billions of dollars Imports have been dominating the domestic seed market. Even when Vietnamese companies are believed to have advantages in the rice seed market, they can only satisfy 33 percent of the demand, according to the Ministry of Science & Technology, leaving openings for foreign seed companies

Rising Sales of Combine Harvesters and Tractor Implements will surge the Growth of Agricultural Equipments Market in Vietnam (Ken Research)

Many leading players in the market are importing products from other Asian countries such as China and Japan as import tariffs have been reduced to 0%.

The government of Vietnam has provided a supporting hand to develop agricultural machinery production in the country. Still, there is a significant lack of Government financial support for local manufacturers of agricultural machinery in Vietnam. Foreign machine import has not been controlled by the government

Highlight

- The Vietnam agricultural machinery market is expected to grow at a CAGR of 11.5% during 2024-2029. Vietnam is promoting agricultural mechanization to increase productivity and reduce labor costs.
- More than 70% of the cultivated area in Vietnam has been mechanized
- \$ 12.4 billion: Vietnam spends every year to import agricultural materials for production. Tractors, plows, harvesters, tillers, and seeders are the most popular types of agricultural machinery.

Exhibitor Profile

- Agriculture Chemicals: Chemical Pesticides & Intermediates (Pesticides, Bactericides, Herbicides,...); Biopesticides, Ecological Pesticides, Agriculture Chemical Production & Processing technologies

- Chemical Fertilizers: Nitrogen Fertilizers, Potash Fertilizers, Phosphate Fertilizers, Compound Fertilizers, . . . New Special Fertilizers (Seaweed Fertilizers, Biological Fertilizers, Foliage Fertilizers, Slow Release Fertilizers, Trace Element Fertilizers, Humid Acid Fertilizers, ...)

- Protection Crops & Biotechnology: Plant Growth Regulators, Transgenic Products, Soil Additives, Nutritional Agents, Turf

- Auxiliary products and services: Raw materials; Formulation; Technical; Manufacturing/ Processing/ Laboratory/ Testing/ Labelling/ Packaging/ Spraying Equipment; Laboratory/ Consultancy/ Registration/ Training/ Research & Development Service; Technology; Investment

Visitor Profile

- Mass Agromachinery Product Users
- Mass Agromachinery Technology Users
- New Agriculture Product & Technology Applied Organizations
- Terminal Users of New Agriculture Products & Technology
- Farmers, Agriculturists & Agronomists
- Entrepreneurs, Farm Contractors
- Engineers & Technicians
- Investors and Bankers
- Registration Agency and Consultant
- Agriculture Department
- Agro Producers
- Universities and Research Institutions
- Government Representatives
- Related Correlative Enterprises & Organizations

Program

Conference/ Seminar
Farm visit/ Factory visit
Business matching
